EDUCATION

B.Tech – Electronics and Communication Engineering

Vel Tech University, India

CGPA: 8.5

Aug 2023 – Sep 2027

Class XII (MPC)

Narayana Junior College, Kadapa

CGPA: 9.2

2021 – 2023

Class X

Nagarjuna Model School, Kadapa

CGPA: 10

2021

PROJECTS

Autonomous Fire-Fighting Robot

- Built an Arduino-based robot capable of detecting flames using sensors and extinguishing fire with a water pump system
- Integrated real-time detection and automated response mechanisms

MIMO Antenna for Smart Agriculture

- Designed a compact MIMO antenna operating in the sub-6 GHz band
- Achieved high isolation and improved signal efficiency for IoT-based agricultural systems
- Enabled reliable wireless communication for smart farming applications

AI-Driven Metamaterial Antennas for Next-Gen Communication

- Applied machine learning techniques to optimize antenna gain, bandwidth, and beamforming
- Proposed an adaptive and reconfigurable antenna system using AI models
- Analyzed performance improvements for future wireless communication systems

SKILLS

Programming: C, Python

Technologies: IoT, Machine Learning

Tools: MATLAB / Arduino / HFSS

CERTIFICATIONS

- C Programming Certification
- Infosys – Artificial Intelligence & Machine Learning
- IBM – VLSI Design

ACHIEVEMENTS & ACTIVITIES

- Developed AI-based optimization concepts for metamaterial antennas
- Successfully built and demonstrated an autonomous fire-fighting robot
- Managed stage, lighting, and coordination for college events

LANGUAGES

English – Advanced

Telugu – Native

Hindi – Intermediate
